From (Name) Lieut.-Col.S.C.Contractor, M.B., I.M.S.,

(Designation) Inspector-General of Prisons, and Chief Inspector of Certd. Schools.

To The Secretary to the Government of Madras,

Home ✓ Department.

Sir,

The Headmaster, Junior Certified School, Bellary, reports that the cost of one work bench made out of country wood (viz., Mathi wood) works out to Rs.20/- and the cost of one cup board made out of dealwood to Rs.3/- according to the present market rates for wood. The work benches and the tool cupboards will be manufactured in the school itself. A revised indent, taking the above facts into consideration, has been prepared by the Headmaster amounting to Rs.1868-7-10 and it is submitted herewith. The Headmaster states that the

Mp 5-7 in pa

 prices

prices for the tools estimated for in the indent cannot be taken as the standard as the present market rate of the tools is comparatively very high due to the present international situation. Hence, the approximate increase on the total cost of the present indent is likely to be 50 per cent.

2 The Headmaster states that there are 18 planks of country wood lying in stock in the school and if these planks are used for making the work benches, the cost of the indent is likely to be reduced by Rs.84/-.

3 In this connection, I submit that the Headmaster has brought to my notice that the Carpentry Class is very much handicapped for want of tools as most of the tools in the Carpentry Class which were received by transfer from the old Alipuram Jail have completely worn out. I noticed this during my last inspection also. He states that much difficulty is experienced in turning out orders in time I therefore recommend that the revised indent referred to above may be sanctioned.

Lieut.-Col. I.M.S.,

Deduct					
	Probable increase in receipts from sale of manufactured articles		(not known)		

NOTE BY THE ADMINISTRATIVE DEPT:

There is at present a carpentry section in the Junior Certified School, Bellary. The Hony. Inspectress of Certified Schools inspected the school in March 1938 and recommended that, as the carpentry section of the school was the most useful for the training of boys, it might be enlarged. In a submitting

his remarks on the inspection report, the C.I. of Certified Schools stated that there were only 6 work benches in the section and that this was considered insufficient by the Inspector of Industrial Schools when he visited the school. The C.I. stated that he had called for an indent for additional tools etc. from the Supdt. (Headmaster) of the school. In September 1938, the C.I. submitted an indent for Rs.3,016 for the sanction of Government and stated that in view of the large number of boys (126) employed in the industry, the number of tools had to be increased, to enable 50 boys to work at a time. As the amount was considered excessive, the indent was returned to him and he was asked to consult the Director of Industries and to reduce the requirements to the minimum compatible with the number of boys to be trained. The revised indent submitted by the C.I. was for Rs.2,248. On a further reference from Government, the C.I. reported that if the proposal was accepted, no additional instructor would be necessary and that the scheme involved a recurring expenditure of Rs.2 yearly for each pupil for the purchase of timber for instructional purposes when there were no orders from the consuming departments. He also stated that, as a result of the enlargement of the class, the receipts by the sale of manufactured articles would increase,

but that no actual estimate was possible under this head. The C.I. was asked to bring forward the proposal as a Part II Scheme for 1940-41. The C.I. has accordingly requested that the scheme submitted by him may be considered in connection with the Part II Schemes for 1940-41

The present strength of the carpentry class is 112, against the total strength of 378 of the school. The training of so large a proportion of the boys in carpentry is considered to be justified in view of the fact that carpentry interests most of the pupils, and is useful to them after they leave the school.

The estimated (non-recurring) cost of purchase of tools and work benches as given by the C.I. is Rs.2,248. It is proposed to ~~tell~~ inform the I.G. that the work benches should be made in the school of suitable timber, not necessarily teak, and that the tool-cupboards should be made from deal or other cheap wood by the boys themselves and to ask him to revise his estimates. It is expected that a provision of Rs.1,900 ~~would~~ will be sufficient ~~to meet the purpose~~ and this amount has ~~now~~ been entered in the summary above.

The proposals made are with a view to giving the pupils a ~~good~~

training ~~while they are detained~~ in the school, ~~so that the training given~~ *which will be* ~~may be~~ of genuine assistance to them in obtaining employment when they are discharged from the school. This dept. therefore, recommend that the proposal of the C.I. may be accepted, and that provision may be made in the budget for 1940-41 as noted in the summary above.

NOTE BY THE ADMINISTRATIVE DEPARTMENT.

There is at present a carpentry section in the Junior Certified School, Bellary. The Honorary Inspectress of Certified Schools inspected the school in March 1938 and recommended that, as the carpentry section of the school was the most useful for the training of boys, it might be enlarged. In submitting his remarks on the inspection report, the Chief Inspector of Certified Schools stated that there were only 6 work benches in the section and that this was considered insufficient by the Inspector of Industrial Schools when he visited the school. The Chief Inspector stated that he had called for an indent for additional tools, etc., from the Superintendent (Headmaster) of the school. In September 1938, the Chief Inspector submitted an indent for Rs. 3,016 for the sanction of Government and stated that in view of the large number of boys (126) employed in the industry, the number of tools had to be increased, to enable 50 boys to work at a time. As the amount was considered excessive, the indent was returned to him and he was asked to consult the Director of Industries and to reduce the requirements to the minimum compatible with the number of boys to be trained. The revised indent submitted by the Chief Inspector was for Rs. 2,248. On a further reference from Government, the Chief Inspector reported that if the proposal was accepted, no additional instructor would be necessary and that the scheme involved a recurring expenditure of Rs. 2 yearly for each pupil for the purchase of timber for instructional purposes. There were no orders from the consuming departments. He also stated that, as a result of the enlargement of the class, the receipts by the sale of manufactured articles would increase, but that no actual estimate was possible under this head. The Chief Inspector was asked to bring forward the proposal as a Part II Scheme for 1940–41. The Chief Inspector has accordingly requested that the scheme submitted by him may be considered in connexion with the Part II Schemes for 1940–41.

The present strength of the carpentry class is 112, against the total strength of 378 of the school. The training of so large a proportion of the boys in carpentry is considered to be justified in view of the fact that carpentry interests most of the pupils, and is useful to them after they leave the school.

The estimated (non-recurring) cost of purchase of tools and work benches as given by the Chief Inspector is Rs. 2,248. It is proposed to tell the Inspector-General that the work benches should be made in the school of suitable timber not necessarily teak and that the tool cupboards should be made from deal or other cheap wood by the boys themselves and to ask him to revise his estimates. It is expected that a provision of Rs. 1,900 would be sufficient to meet the purpose and this amount has been entered in the summary above.

The proposals made are with a view to giving the pupils a good training while they are detained in the school, so that the training given may be of genuine assistance to them in obtaining employment when they are discharged from the school. This department therefore, recommend that the proposal of the Chief Inspector may be accepted, and that provision may be made in the Budget for 1940–41 as noted in the summary above.

From the C.I. of Certified Schools, No.3116/S2/39, dated 21.2.40.

With reference to the orders at 'A' on p.2 of 'P', please see the memo. at pp.1-2 c.f. and the revised indent submitted by the C.I. at pp.5-7 c.f. The revised indent is for Rs.1868-7-10 or Rs.1869*. It is stated that if the planks lying in stock in the school are used, the cost will be reduced by Rs.84; That is the net amount will be Rs.1785 against Rs.2248 ~~last~~ submitted by him (in ~~August~~ March 1939). The C.I. states that the cost of indent ~~will have to~~ may be increased approximately by about 50% if the ~~wage~~ increased prices of the tools ~~etc~~ are taken into account. That is, the total cost will be Rs.2677.
